HARDWARE INVENTORY TABLE

Hardware	Purpose	Image
Raspberry Pi	Main device for logic and MQTT	Ultrasonic Sensor	Measures the distance to water surface	
Temperature Sensor (ds18B20) Module	Collects the temperature from the outside world for analysis	
LEDs	Visual status indicators	
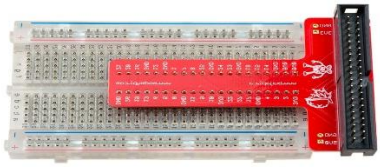
Buzzers	Audible alarm for warnings	DC Fan	Represents automated gate closure	
Buttons (x2)	Stop the buzzers and manual gate control	


Rotary Encoder	Flood threshold configuration	
A GPIO Extension Board	Connect the different wires
